

```
#include <stdio.h>

int main (int argc, char* argv[]) {

    printf("Name: Cody Brooks\n");
    printf("Course Title: CprE 185\n");
    printf("Today's Date: 215-09-11\n");

    return 0;

}
```

The screenshot shows a terminal window with a light blue title bar. The title bar text is `/cygdrive/x/Documents/cpre185/cmbrooks/lab2`. The terminal has a black background with green text. The prompt is `cmbrooks@co2018-00 /cygdrive/x/Documents/cpre185/cmbrooks/lab2`. The user enters `$./lab2-1`, and the program outputs three lines: `Name: Cody Brooks`, `Course Title: CprE 185`, and `Today's Date: 215-09-11`. The prompt returns, and the user enters `$` followed by a vertical ellipsis.

```
/cygdrive/x/Documents/cpre185/cmbrooks/lab2
cmbrooks@co2018-00 /cygdrive/x/Documents/cpre185/cmbrooks/lab2
$ ./lab2-1
Name: Cody Brooks
Course Title: CprE 185
Today's Date: 215-09-11
cmbrooks@co2018-00 /cygdrive/x/Documents/cpre185/cmbrooks/lab2
$ ...
```
